

GREAT LOOKING, FAST FITTED, THERMALLY EFFICIENT

REPLACEMENT TILED ROOF THAT CAN INCORPORATE FULL RECTANGULAR GLASS PANELS.

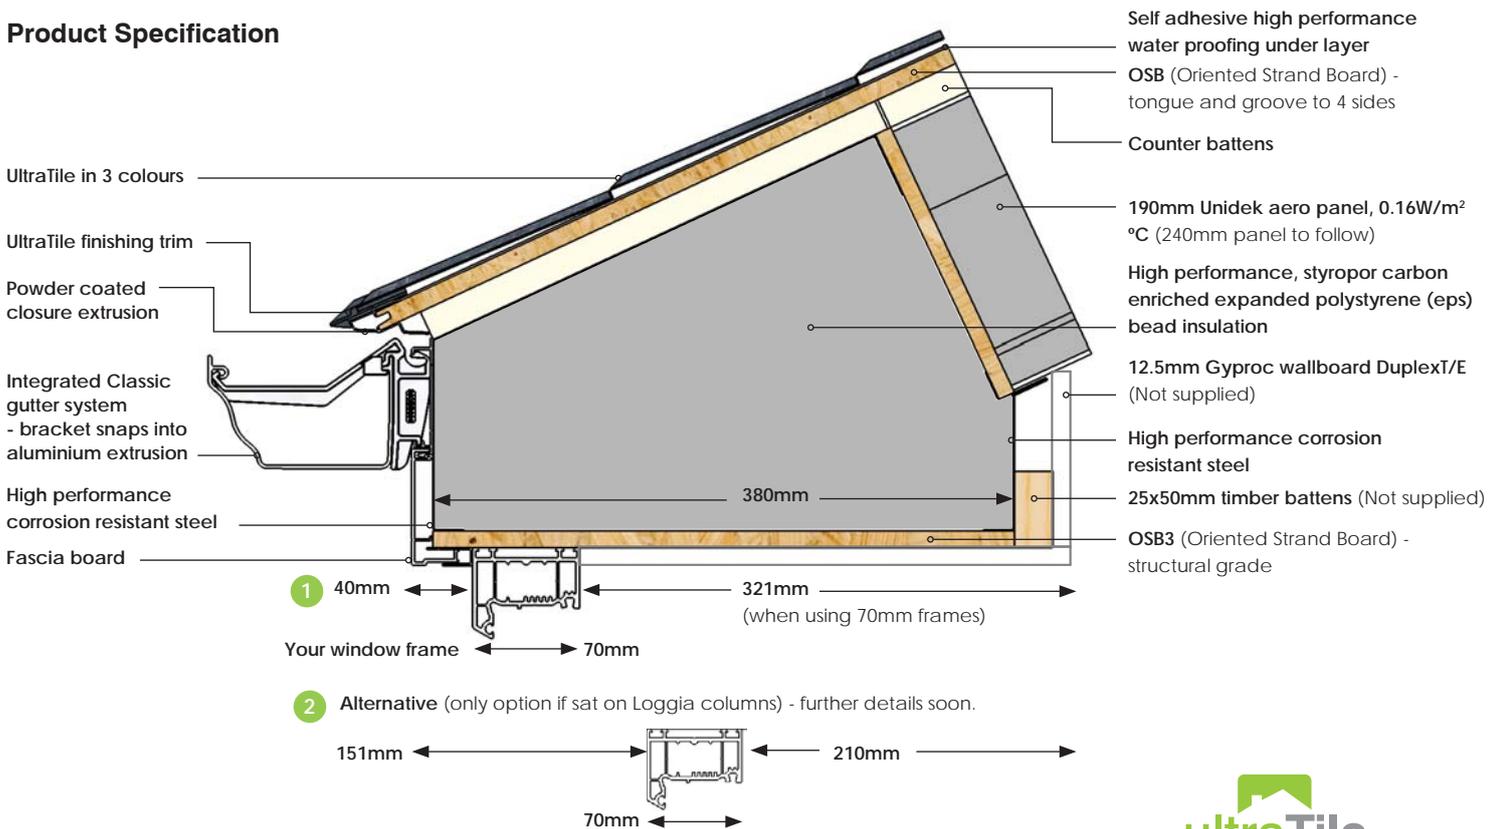

This is a simple lightweight tiled roof perfect for replacing an old tired conservatory roof in one day. There are 3 simple components, making it extremely light and easy to install, faster than any other solid roof onto **existing frames**.

FIT MORE, **EARN MORE**

Product Definition

UltraROOF 380 is perfect for those wanting a lightweight tiled roof refurbishment product for tired conservatory roofs. There are three simple components that form the product, its light weight and ease of installation making it perfect for sitting on existing frames (subject to survey) and so the product of choice for replacing tired glazed conservatory roofs as it can incorporate full rectangular glass panels in the roof similar to LiveinRoof.
